

Number & Cardinality

Number & Cardinality focuses on the skills of counting, comparing numbers, and understanding the number system.

These skills are the **foundational knowledge** your child needs for math success! Your child will learn the meaning of each number and will investigate the many ways numbers can be represented.

Try these fun activities at home or on the go!

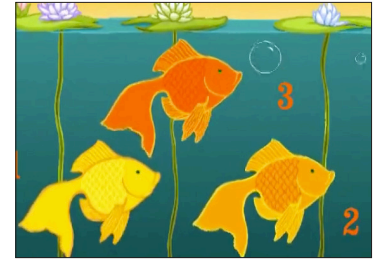

Comparing Groups Ask your child to help fold and put away the laundry! Create a pile for you and a pile for them. Which pile has more? Or are they equal?

Number Fun Hold up a number using your fingers. Ask your child to hop, skip, or jump the number of times shown. You can count together out loud to make sure each action is counted correctly.

Adult [Holds up three fingers] Hop like a frog this many times.

Child & Adult One, two, three!

Adult You did great! Let's try another number.

Your child sings a song about the number 3.

Your child creates a bug with different numbers of bug parts.

The story *A Space Adventure* helps your child count down from 10 to 0.
