

Name _____

How Animals Survive

- ① Draw a line from each word group to the adaptation that helps this animal.
The first one is done for you.

A line drawing of a polar bear walking on a flat surface, likely ice. The bear is facing left. Above the bear are three labels: 'eat meat', 'keep warm', and 'hide in snow'. Below the bear are three labels: 'find food', 'swim in cold water', and 'walk on ice'. A dashed line connects 'eat meat' to the bear's mouth. Another dashed line connects 'find food' to the bear's nose. The background is a simple landscape with a horizon line and a wavy line representing water or ice.

- ② On the back of this paper draw another animal.
Show some of the adaptations that help the animal survive.
